**2. Citations and explanations :**

Reference is made to the following document:

D1: KR 1984-0000974 Y

D1 relates to a microwave oven comprising a cooking cavity, a door and an air duct including air passing holes at an upper plane of the cavity for preventing a door screen from being covered with dew.

Claims 11, 12 and 20 relate to a microwave oven comprising a cooking cavity, a door and an upper duct forming air-curtain.

Comparing claims 11, 12 and 20 with D1, it would be obvious to a person skilled in the art to derive claims 11, 12 and 20 from D1.

Therefore, claims 11, 12 and 20 lack an inventive step under PCT Article 33(3).

The features of the independent claims 1 and 17 are characterized by the upper duct including an inclined plane at the end of the duct body, and differ from those of the prior art.

Therefore, the subject matter of claims 1 and 17 is considered to be novel and to involve an inventive step, and the subject matter of claims 2-10 and 18-19 which respectively depend on claims 1 and 17 is also considered to be novel and to involve an inventive step.
